## 0. INTRODUCTION

One of the obstacles to implementing measures for improving energy consumption in municipal buildings is often that there is nobody at municipal level with sufficient knowledge to assess, propose and decide on actions in the energy field.

ENERinTOWN project will help to remove this obstacle, creating the figure of the local energy manager at a municipal or pan-municipal level.

| MUNICIPALITY         | CONTACT DETAILS             |                                  |
|----------------------|-----------------------------|----------------------------------|
|                      | ENERGY MANAGER              | TELEPHONE                        |
| Kedainiai district   | Edita Kačinskienė           | +370 347 69527<br>+370 682 32522 |
| Kaunas               | Algirdas Vaitiekūnas        | +370 37 423963                   |
| Sakai district       | Juozas Puodžiukaitis        | +370 345 60752                   |
|                      | Gintautas Juozas Dubininkas | +370 611 19755                   |
| Vilkaviskis district | Valdimaras Bakutis          | +37034260092                     |

These persons will be in charge of:

- Managing the consumption-monitoring system installed in the municipal buildings.
- Identifying anomalies and deviations through comparison with similar buildings or with previously established standards.
- Searching and proposing the adaptation of improvements, for which purpose he will use the technical support of the regional energy agency and the experience of other municipalities in similar measures to that proposed.

## 1. PURPOSE

The purpose of this document is to report of the information of the course made to the municipal energy managers organized in Lithuanian Energy Institute on 12<sup>th</sup> of December, 2007.

## 2. DESIGN OF THE COURSE
